Things are very upbeat at Enron. We just celebrated "Enron Day" for the stock hitting 50. It was quite a treat. Enron is a wonderful company to work for, many perks. And, yes, I get my stocks through Enron, another perk.

ENE the virtual company. Profits for 10 years forward being taken in current years. When you shake it down what do you have? The paper mache company.

Dig deep behind the Enron financials and you'll see a growing mountain of off-balance sheet debt which will eventually swallow this company. There's a reason they layer so many subsidiaries and affiliates. Be careful.

--------	---------	----------	----------------	---------

ENE has extremely intelligent employees - agreed. This is offset by selfish, personal-book focus management that has allocated several billion dollars to themselves that should have gone to the shareholders. There is not a business case in the universe where a CEO is worth \$1 billion, let alone a dozen other executives. These clowns are the most overpaid management team on earth, bar none. They treat employees like dirt. To quote ENE management "it's the systems, not the people. We can put anyone on the trading desk and they will succeed, because they are trading for ENE."

--------	---------	-----------------	--------------------------	---------

It will soon be revealed that Enron is nothing more than a house of cards that will implode before anyone realizes what happened. Enron has been cooking the books with smoke and mirrors. The Enron executives have been operating an elaborate con scheme that has fooled even the most sophisticated analysts. When the truth is uncovered, those analysts and ENE investors will feel like a raped school girl. The first sign of trouble will be an earnings shortfall followed by more warnings. Criminal charges will be brought against ENE executives for their misdeeds. Class action lawsuits will complete the demise of ENE.
